PROJECTS

Taxi Service Site | *HTML/CSS, JavaScript, Php, MySQL*

June 2024 – Dec 2024

- Developed a comprehensive taxi service platform with user booking and email confirmation system.
- Designed an intuitive admin panel for seamless management of cars, locations, and cities.
- Integrated unique features like one-click database backup, automatic sitemap generation, and billing.
- Implemented user management tools in the admin panel for efficient user monitoring and control.

Home Service Provider Platform | *Asp.Net, Sql-Server*

Nov 2024 – Present

- Developed a multi-vendor service platform enabling providers to list services with pricing and offers.
- Implemented location-based service availability and time-slot booking for user convenience.
- Designed a user-friendly admin dashboard for managing services, vendors, bookings, pricing, and offers.
- Integrated real-time booking notifications and secure payment options for seamless transactions.
- Optimized the platform for scalability, SEO, and responsiveness across devices.

Billing Software Platform | *HTML/CSS, JavaScript, PHP, MySQL*

Nov 2024 – Dec 2024

- Developed a customizable billing software with user login and field customization options.
- Integrated features to add GST number, company name, customer details, and service/product information.
- Implemented functionalities to calculate quantity, price, GST, prepaid amounts, and generate invoices.
- Added options for saving invoices and downloading them in PDF format for ease of record-keeping.
- Optimized the platform for scalability and enhanced user experience with a clean UI design.
